

SF-BRK Rack Mount Bracket

Installation Instructions

The SF-BRK Rack Mount Bracket enables you to mount up to three Signal Forge 1000 Signal Generators in a standard 19" rack. To install the Signal Forge 1000 in the rack mount bracket,

1. Remove the front panel and bezel of the Signal Forge 1000 by removing the screws on each side of the device.
2. Set the bezel aside—it is not needed for the rack mount configuration.
3. Align the mounting holes of the Signal Forge 1000 with the mounting holes of one of the three positions of the bracket
4. Reinstall the front panel (without the bezel) and reattach the screws.
